3.3 – Data Flow Diagram

The Data Flow Diagram (DFD) of Cosmetic Insights: Navigating Cosmetics Trends and Consumer Insights with Tableau illustrates the flow of cosmetic product data from collection to visualization. The process starts with importing cosmetic datasets from Excel or CSV files into Tableau. The data is then cleaned, validated, and analysed based on product categories, brands, prices, and skin types. Using calculated fields and visual analytics, Tableau creates interactive dashboards and stories that provide valuable insights into consumer preferences, market trends, and product performance. These insights help businesses make informed decisions and improve their marketing and product strategies.

Important Points

- Collect cosmetic data from Excel/CSV files.
- Import and prepare data in Tableau.
- Clean and validate the dataset.
- Analyse brands, categories, prices, and skin types.
- Create interactive dashboards and stories.
- Generate consumer and market insights.
- Support data-driven business decision-making.
